

Work Order	01024635	Account	St. Vrain Lakes Metro District
Actual Start	9/8/2026 10:30 AM	Contact	Ronnie Kenfield
		Address	4783 Lakeside Drive Firestone, CO 80504 United States

Appointment Information

Specialist	On September 8th, Solitude was	Name	Ryan Evans
Comments to	on site at Barefoot Lakes.	Specialist State	
Customer	Solitude inspected both lakes	License	
	for erosion control, aeration,	Number	
	and algae/vegetation. No algae		
	or vegetation was observed at		
	Barefoot East at the time of		
	inspection. However, the water		
	level of the lake has dropped		
	since the last visit on August		
	20th. Tree branches were		
	sticking out of the lake in many		
	places. Upon inspection at		
	Barefoot West, biofilm was		
	discovered. Solitude used 30		
	gal of liquid SeClear algaecide		
	at Barefoot East as a		
	preventative measure and to		
	reduce phosphorus levels.		
	Solitude applied 20 gallons in		
	Barefoot West to control the		
	biofilm. Solitude inspected the		
	shorelines of both lakes for		
	dead fish. No dead fish were		
	found at that time. Erosion was		
	observed at East Barefoot Lake.		
	Solitude is scheduled for		
	erosion restoration in October.		
	Solitude observed that the pond		
	dye applied in August was		
	starting to fade. Solitude plans		
	to add more pond dye during		
	the September 22nd visit. We		
	will apply both blue lagoon blue		
	dye and lochness black dye.		

Specialist The amounts will be in the
Comments to September 22nd service report.
Customer The faulty air compressor was
 replaced. With the new
 compressor, 12 diffusers were
 working at Barefoot East. They
 also observed 2 disconnected
 lines. Solitude inspected the air
 filters for each compressor.
 They are all still in good
 condition. Solitude tested water
 quality at Barefoot Lakes and St
 Vrain Creek on September 8th.
 Solitude is happy to answer any
 questions regarding this report.
